Vibrating Feeder

overview
The vibrating feeder is mainly used for continuously and evenly feeding coarse crusher, screening fine aggregate, and thus enhances crusher capacity. When operated, the vibrating feeder can send massive and granular materials to the receiving device evenly, regularly and continuously. In the sand making production line, its even and continuous feeding crusher helps avoid feeding-hole blocking. It can also roughly screen the materials. The vibrating feeder has been widely used for crushing and screening in the industries of mine, metallurgy, building materials, chemical engineering, beneficiation, coal mine, etc.

Features
1. The vibrating feeder features double screening and embodies the functions of dirt removing, screening and feeding. It is characterized by even feeding, excellent continuity and adjustable vibrating force.
3. Smooth operation, great feeding capacity and high efficiency.
4. It has the advantages of clear structure, convenient adjustment, installation and maintenance.
5. Eccentric block is the vibration source which features smooth operation, low noise, little electricity consumption, excellent adjustability and causes no material clashing.

6. The current can be changed and controlled at any time conveniently.

7. The vibrating feeder features excellent tightness. Totally-closed feeding saves clients the trouble of local dedusting and gas defense.

Application

The vibrating feeder has been widely used in crushing and screen joint equipment in the industries of metallurgy, beneficiation, building materials, chemical engineering, coal mine, material grinding, etc. The vibrating feeder embodies the functions of screening and feeding. The vibrating device enables the equipment to give full play of its vibrating and screening function. It is the ideal equipment of excellent combination functionality.

Established in 1997, Dingsheng is a major manufacturer and supplier of vibrating feeder in China. In addition to the vibrating feeder, our company provides impact crusher, sand maker, roller crusher, etc. Our company is located in Zhengzhou City, giving us easy access to convenient air and land transportation. This helps us reduce production
cost and enables our clients to reduce transportation costs.

If you are interested in any of our products, please feel free to contact us.

Dingsheng is ready to be at your service.

**Service**

Dingsheng has always pursued the service concept of "Create customer value, the customer is always right". As for service, clients' needs have always been our primary concern. Through standardized, differentiated and super valued service, we can reduce clients' psychological cost and use-cost, and ultimately increase clients' transition value, profitability and purchasing power. As a result, we can improve Dingsheng's service brand competitiveness and lead the way of service for fellow competitors.

**Accessories Service**
Our company is a major manufacturer of wear resistant materials. Dingsheng has always valued product quality as its core value. Most of our parts and quick-wear parts are manufactured with quality ear-resistant materials and advanced processing techniques. Our equipment features excellent durability and wear resistance.

**Service Network**

Presently, Dingsheng has offices and branch companies in more than 10 countries and regions, and 31 offices in China. In addition to traditional after-sale service, our company offers internet sales and product trace services. We guarantee that we will offer our valued clients timely and thorough services.

**Service Team**

Our company has 30 engineers providing professional after-sale services. They are all skilled, experienced and familiar with the working principles of various machines and equipment. We promise that we will arrive on scene within 48 hours for 1000 kilometers when we get a call from our clients and not over 72 hours for clients farther away.
