Reciprocating Feeder

overview
Our company has successfully designed and manufactured the new WF series reciprocating feeder to meet present market needs. It is mainly used for feeding various non-sticky materials. The reciprocating feeder can send massive and granular materials from feed bin to receiving device evenly and continuously. In the sand making production line, the reciprocating feeder evenly and continuously feeds which helps crusher feeding hole blocking.

Features
1. Feeding amount can be conveniently adjusted at any time.
2. Simple structure and reliable performance.
3. Matching power and operating cost are both low.
4. Designed with no quick-wearing parts makes equipment maintenance quite convenient.
5. Occupies little space and requires just 1/5 the investment of medium plate mill.

Application
The reciprocating feeder has been widely used in the crushing and screening line of the industries of beneficiation, building materials,
electricity, chemical engineering, etc.

Welcome to Dingsheng! Our company is a major manufacturer and supplier of reciprocating feeder in China. With over 10 years of experience, we are capable of providing a wide range of crushing products, including wear resistant parts, roller crusher, single stage hammer crusher, tire mobile crushing and screening plant, etc. Our products are characterized by superior quality and competitive prices, as a result of our strict quality and cost control measures, as well as convenient transportation network.

If you are interested in our feeder and screen, please feel free to contact us.

Service

Dingsheng has always pursued the service concept of "Create customer value, the customer is always right". As for service, clients' needs have always been our primary concern. Through standardized, differentiated and super valued service, we can reduce clients' psychological cost and use-cost, and ultimately increase clients' transition value, profitability and purchasing power. As a result, we can improve Dingsheng's service brand competitiveness and lead the way of service for fellow competitors.

Accessories Service

Our company is a major manufacturer of wear resistant materials. Dingsheng has always valued product quality as its core value. Most of our parts and quick-wear parts are manufactured with quality ear-resistant materials and advanced processing techniques. Our equipment features excellent durability and wear resistance.

Service Network

Presently, Dingsheng has offices and branch companies in more than 10 countries and regions, and 31 offices in China. In addition to traditional after-sale service, our company offers internet sales and product trace services. We guarantee that we will offer our valued clients timely and thorough services.

Service Team
Our company has 30 engineers providing professional after-sale services. They are all skilled, experienced and familiar with the working principles of various machines and equipment. We promise that we will arrive on scene within 48 hours for 1000 kilometers when we get a call from our clients and not over 72 hours for clients farther away.
